Thinking about a study you may run with ALSPAC data (or one that you have recently run)... If ALSPAC required that I use an 25% 44% 30% ECAW, I would be less willing to use their data in my research If ALSPAC ran a study on ECAWs, I 20% 53% 27% would opt-in. 10% 35% 55% ALSPAC should run a study on ECAWs. I would prefer using an ECAW than 22% 33% 45% using typical preregistration 100% 50% 0% 50% 100% Strongly disagree Somewhat disagree Neither agree nor disagree Somewhat agree Strongly agree
